City Manager's Agenda Item #8

April 11, 2005

To the Honorable, the City Council:

I am submitting, for City Council approval, a loan order and order of taking that will result in paving the way for the siting and construction of a new police station.

One of the stated City Council objectives for capital projects this year has been the siting and funding of a modern police facility. Much work has gone into the process by the City Council sub committee on Public Safety, and the City and Police administration.

A unique opportunity has been identified to acquire a property that would result in achieving that objective. The property, 125 Sixth Street, is a newly constructed "shell" building of approximately 96,000 square feet. This will meet the programmatic needs of a 21st Century Police Facility, and, possibly contain adequate space to relocate the Emergency Communications Center, which will allow greater utilization of fire headquarters by the Fire Department.

As you are well aware, locating a facility of this nature is not without challenge. This property is within reasonable walking distance of both the Kendall Square and Lechmere MBTA stations, does not immediately infringe on residential areas, and is in a predominantly office/R&D area.

I have had a professional feasibility study done to analyze the potential of "fitting out this shell" as a modern police facility. While still in draft form, this analysis concludes that such a fit is achievable and at a cost that will keep the project within 10% of the \$45 million budget estimate of several years ago.

The property has been appraised with a stated fair market value of \$29,600,000. The owner will agree to a "pro tanto" payment of \$29,550,000 in the eminent domain proceeding.

The Financing Plan for the project, that was presented to the Credit Rating Agencies and the City Council, contained a projected bonding of \$45,000,000 beginning next fiscal year with a bonding schedule of \$5,000,000 for "site" acquisition in FY06 and two \$20,000,000 issuances in FY07 and FY08.

This proposal requires modifying that plan to reflect the upfront cost of acquiring not only a site, but also a new building. This plan results in the issuance of \$36 million dollars in bonds in FY06 and \$13.5 million dollars in bonds in FY07. However, the use of available funds will allow a financing structure that will not result in any greater impact on the tax levy in FY06.

The original financing plan for the police station is not significantly changed from the 5-year plan with the purchase of this building, due to a revised bonding schedule and the possible use of reserves.

Timing is important both from a real estate perspective and a cost perspective. In an active real estate market the property owners have other opportunities that could preclude the City from taking advantage of this solution. Secondly, construction costs are escalating at an extremely high rate. Acting now, without the necessity of analysis of soils conditions, and with both of the rapidly increasing items (steel and concrete) already in place, I believe the preliminary total cost estimate of \$49.5 million dollars can be adhered to.

Favorable action is strongly recommended.

Very truly yours,

Robert W. Healy
