

Open Space Needs Assessment

Park Access Score by 1-Acre Grid Cell

Cambridge, Massachusetts

Rindge Ave.

Fitchburg Commuter Rail Line

Danehy Park

Scoring Total for Park Distribution

- 0.00 - 4.69
- 4.70 - 6.26
- 6.27 - 10.69
- 10.70 - 19.26
- 19.27 - 38.75

Distribution Scores

This map shows the weighted Needs Assessment scores for variables that make up the Park Access factor: Proximity to Multiple Park Types, Park Space Near Populated Grid Cells, Park Space per Resident, and Park Space per Worker. These scores are combined on a separate map with scores from three other factors (Community, Public Health, and Resilience) to arrive at a final score for each one-acre grid cell in the City. Higher scores reflect areas of greater need.
