To Be Entered Into Communications  
9/25/02. Peter Valentine 37 Brookline

There is a flaw in the city public communications issues. The People are guaranteed the right to publicly assemble and communicate their concerns to their gov't officials..

But in Cambridge MA this conflicts with the time issue of the Council carrying on its immediate matters. and

Since this right is guaranteed by both the Massachusetts and US Constitutions and both these constitutions prevail over any city constitution and city councillors swear oath to uphold both constitutions, the Peoples's Right on this matter cannot be denied and therefore I suggest that one day a month be set aside for citizens and city councillors must attend a meeting to hear citizen concerns. If a councillor states that they are too busy to do this, that person is not fit to fulfill the responsibilities that they are paid for and should leave office.
